SUMMARY

Computer Engineering graduate (B.E., 2026) with hands-on experience across the full data analytics pipeline: data cleaning and relational modeling in Python and SQL, predictive modeling with scikit-learn, and BI dashboard design in Power BI, Tableau, and Excel. Seeking an entry-level Data Analyst or Business Intelligence Analyst role to deliver actionable insights through data-driven decision making.

TECHNICAL SKILLS

Languages: Python, SQL (MySQL), JavaScript, HTML/CSS
Data Analytics & ML: Pandas, NumPy, scikit-learn, Excel, Power BI, Tableau, Tableau Prep Builder, Matplotlib, Seaborn
Analytics Concepts: Statistics, Data Cleaning, Data Modeling, EDA, Predictive Modeling, KPI Reporting, Dashboarding, DBMS
Tools: Git, GitHub, Linux, VS Code, Jupyter Notebook, Bootstrap, jQuery

PROJECTS

Business Prediction Model: Coffee Shop Analytics | Python, Pandas, scikit-learn May 2026

[GitHub Repository](#)

- Identified median area salary as the dominant driver of latte pricing (94% feature importance), outweighing shop ratings and competitor density — the key business insight from the analysis.
- Merged 1,000 coffee shop records with U.S. Census population data across 1,700+ zip codes, engineering features such as local coffee shop density and area population.
- Trained and tuned Random Forest, Gradient Boosting, and Linear Regression models via GridSearchCV; best model improved on baseline with $R^2 = 0.46$ and MAE = \$0.21.

Sales Analytics Project | Python, Pandas, Excel, Power BI Apr 2026

[GitHub Repository](#)

- Built an interactive Power BI dashboard surfacing \$2.3M in tracked sales and \$286K in profit across 4 regions and 3 product categories.
- Cleaned and restructured 9,994 retail orders spanning 793 customers and 1,862 products into normalized Customer, Product, and Order tables using Python and Pandas.
- Enabled drill-down analysis into customer segments, regional performance, and product profitability to support business decision-making.

Student Performance Analysis Dashboard | Python, Pandas, NumPy, Matplotlib, Seaborn, Power BI Jan 2026

[GitHub Repository](#)

- Cleaned and analyzed 1,000+ student records using Python, Pandas, and NumPy, performing EDA and feature engineering to uncover relationships between demographics, parental education, and test preparation.
- Created Matplotlib/Seaborn visualizations to communicate key factors influencing academic performance.
- Built an interactive Power BI dashboard to present performance metrics and analytical insights.

EXPERIENCE

Web Development Intern Nov 2024 – Dec 2024

Anvistar ITS Pvt. Ltd. — Remote/On-Site

- Designed and developed 5+ responsive web application interfaces during a 45-day internship using HTML, CSS, JavaScript, Bootstrap, and jQuery, using Git for version control throughout.
- Built mobile-first, cross-browser compatible UI components, improving page responsiveness and user experience across devices.
- Collaborated with developers to troubleshoot bugs, optimize front-end performance, and deliver data-driven UI features within deadlines.

EDUCATION

Bachelor of Engineering in Computer Engineering 2022 – 2026

Rajiv Gandhi College of Engineering — Maharashtra, India

CERTIFICATIONS

- HackerRank SQL (Intermediate): Complex joins, unions, sub-queries — [View Certificate](#) — Jun 2026
